# Introduction

Your astrological horoscope (natal chart) at birth is an important key to your personality and character, but your natal chart is not the last word about you. As time moves on after the moment of your birth, the Sun, Moon, and planets continue to circle through the heavens forming ever-changing kaleidoscopic patterns in relation to your own birth chart, bringing out or obscuring this or that part of you.

It can be useful to know how these ongoing planetary patterns relate to your life, and that is what this report is about. Here we calculate the primary astrological changes in your chart and interpret them so that you can see at a glance what is happening at any given time. Your events are arranged and interpreted chronologically, by well-known astrologer Michael Erlewine, and each event includes date and time, keywords, astrological indicator, and an astro-tarot card. We hope you enjoy your forecast.

In the tradition of astrology the planets have always been interpreted separately from the Sun and the Moon, which are called "The Lights," and for good reason. They literally light up our life and their combined interaction describes the essence of what is happening to us at any given time. Although called "The Moon Report," any mention of the Moon automatically involves the Sun, and of course, our Earth. These three, the Sun, Moon, and Earth, in their endless interaction are perhaps the single most important factor to observe in astrology.

The ever-changing relationship in the sky between the Sun and the Moon is perhaps most obvious at the Full Moon, but as we know, it is going on all the time. This report tracks the Sun-Moon relationship as it relates to your particular natal horoscope and birth chart, detailing all of the major events that take place in the current month for a specific life area and planet.

The Moon has always represented the 'mother', meaning anything that nurtures or cares for us, our support system, however that is made up. It also indicates our emotional makeup, how we feel about things, and the nostalgia of the past - where we came from.

On the other hand, the Sun represents the 'father' principle and the future, where we are heading toward and, to some degree, the means we have to get there. The Sun burns brightly, while the Moon is cool and comforting. The two together mark the endless play between the past and the future, and we here on Earth, are caught right in the middle, that is: the present.

# About the Career and Life Path Forecast

## Your Jupiter Forecast

Jupiter is the planet of career and life direction. One of the ancient Sanskrit words for Jupiter is 'guru' and Jupiter is literally the guide as well as the path we take through life. The planet Jupiter is always our way through whatever obstacles or circumstances we are currently faced with, including the problems, which usually involves the laws of this universe and the planet Saturn. This is why lawyers are connected to Jupiter. They handle the law, and show us (at times) how to get around the law.

This forecast is about how the planet Jupiter figures in your natal chart and what it portends for the immediate future. It will have much to say about your career and the best path through life for you to tread at this time. We hope you enjoy it.

# Jupiter in your Natal Chart

## Jupiter in your Natal Chart

Before we present your Jupiter forecast for the coming months, let's review how the planet Jupiter is configured in your natal or birth chart. What follows is an interpretation of Jupiter at your birth to the Sun, Moon, and other planets. It should help to give you a general idea of how you related to matters of career and a life path. Here goes:

**Jupiter Square Moon**  
(Waxing)  
087°47'

## Sign of Success

You find success or at least get acknowledged through working with the public, or through your support structure - family, friends, your past. You can move from trying to make plans of success real to actually making that first step to actualization, to something substantial that you can build on.

**Jupiter Conjunct Sun**  
(Waning)  
359°38'

## Ideas for Success

When it comes to success and career, your mind is always filled with all kinds of fresh ideas and plans, firing the imagination with visions of overcoming and succeeding. You concern is always how to get these ideas from the planning stage to the action arena.

**Jupiter Conjunct Mercury**  
(Waning)  
347°52'

## Career Thoughts

Plans and thoughts of career, education, and advancing or training the mind, in general, naturally fire you up and give you new goals.

**Jupiter Semisquare Venus**  
(Waning)  
316°50'

## Just Let Go

You have good critical vision and are able to examine just how you feel and care for matters relating to work and career. You have an objective view of these matters, and can see what could be modified and what better be tossed out. You can make the hard calls, but would prefer keeping it simple.

## Your Jupiter Forecast

Now that we have reviewed how Jupiter is configured at your birth, let's get to the heart of this report, a forecast as to how Jupiter (matters of career and direction) will play out in the coming months. These are the actual transits that will occur between the Sun, Moon, and other planets in relations to Jupiter, laid out in an easy-to-read calendar-like format.

Each event will be described by date, day of the week, and include an interpretation written by astrologer Michael Erlewine about how that event might appear in your life. This includes a brief keyword description, when you can expect this event to be exact, the astrological jargon professional astrologers can read, and even a little tarot-like card image to jump-start your imagination.

By reading through the activity of Jupiter forecast in the coming months, you basically have a roadmap of how this planet will manifest its nature and play out in your life. We hope you enjoy your forecast.
